```
In [1]: # Versão da Linguagem Python
        from platform import python_version
        print('Versão da Linguagem Python Usada Neste Jupyter Notebook:', python_version())
```

Versão da Linguagem Python Usada Neste Jupyter Notebook: 3.7.6

## **\*\* ATENÇÃO \*\***

Caso você tenha problemas com acentos nos arquivos:

Primeiro, recomendamos a leitura do material sobre Formato Unicode, ao final do capítulo 4.

Uma forma de resolver esse problema, é abrir o arquivo em um editor de texto como o Sublime Text, clicar em File - Save with Encoding e então salvar com encoding UTF-8.

Outra opção é incluir o parâmetro encoding='utf8' ao abrir o arquivo para leitura ou escrita.

## Arquivos

Obs: Crie um arquivo txt, chamado arquivo1.txt no diretório "arquivos" na pasta onde está seu Jupyter Notebook, digite a frase: Python é uma linguagem poderosa! e salve o arquivo.

## Lendo Arquivos

```
In [1]: # Abrindo o arquivo para leitura
        arq1 = open("arquivo1.txt", "r")
```

```
In [2]: # Lendo o arquivo
        print(arq1.read())
```
